

# BackerBoard

## Siding Insulator & Underlayment

BackerBoard is manufactured from *RayLite*® brand expanded polystyrene insulation. *RayLite*® is a superior quality insulation that is extremely lightweight. *RayLite*® resists water absorption, will not mold, rot or decay and will not create a second moisture barrier. *RayLite*® BackerBoard cuts easily with a knife or can be scored and snapped over a sharp edge. *RayLite*® BackerBoard's high compressive strength and R-value of 3.85 per inch @ 75° F. make it an excellent siding underlayment and insulator.

## *RayLite*® Custom Fit BackerBoard

- Is designed to fit any siding profile.
- Increases impact resistance for siding.
- Helps reduce drafts and energy costs in the home.
- Improves looks of siding with less lap exposure and truer profiles.
- Reduces accumulation of wind driven dirt and streaking.
- Packaged 2 squares per bag.
- Other related products such as corner posts and starter strips available for complete system installations.

Standard  
Flat  
Backer Board

Standard  
Contour  
Backer Board
